Performance Instructions

Different Saxophones

Note that this document has a different score for alto, tenor, and bari. There are slight differences between them to make each more idiomatic and/or musically compelling. If you're interested in playing *saccades* on a different instrument, get in touch! ted@tedmooremusic.com

Media Files

To get the video and tape file, as well as the click track, get in touch with the composer at ted@tedmooremusic.com.

Click Track

The video file used for performance includes the stereo tape part. The click track needs to be played at the same time and routed to the performers earbud or headphones. The click track and video file can be lined up in a DAW to start at the same time and everything will be aligned. The click track includes a count-in of four beats before measure 1 in the score.

Video Projection

When projecting the video, it should be as large as possible. If possible (and if it looks good) the performer should be in front of the projector screen so the video is, in part, projected on their body.

Amplification

The saxophone can be slightly amplified if it helps blend with the tape part. The saxophone and the tape part together should feel pretty loud, really filling up the presence of the space. If possible, a sound technician can ride the fader of both the tape and saxophone to adapt the dynamics to the performance space.

Multiphonics

The multiphonics are drawn from *The Techniques of Saxophone Playing* by Marcus Weiss and Giorgio Netti. The prefix "WN" ("Weiss-Netti") used before a number indicates a multiphonic in the book. The fingerings are provided in the score. If a particular multiphonic doesn't work well, feel free to choose another one, preferably with similar pitch-class content (which octave is less important).

Mvt. I, *saccades*

- *saccades* by Ted Moore (bari) -

♩ = 116 bisb.

The musical score is written for a baritone voice and consists of six staves of music. The tempo is marked as ♩ = 116 bisb. The score includes various dynamic markings and performance instructions.

growl < > (ord.)

254

octave tremolo

bisb.

Musical score for measures 254-257. The top staff (treble clef) features an octave tremolo in measures 254-255, indicated by a thick horizontal line. In measure 256, there are growl markings (less-than and greater-than signs) under the notes. In measure 257, there is a 'bisb.' marking. The bottom staff (grand staff) shows a melodic line in the right hand and a sustained bass line in the left hand. Sound effect notations 'pwew-cha' (with a triplet of eighth notes) and 'dee-ow' (with a dotted quarter note) are placed above the right hand in measures 256 and 257 respectively.

258

multiphonic
B-4

WN113

Musical score for measures 258-261. The top staff (treble clef) has a multiphonic B-4 marking in measure 258, represented by a large 'X' over a whole rest. In measure 260, there is a WN113 marking with a graphic of a vertical column of circles of varying sizes. The bottom staff (grand staff) shows a melodic line in the right hand and a sustained bass line in the left hand. Sound effect notation 'chahah...' (with a dotted quarter note) is placed above the right hand in measure 260. Dynamics markings 'mp' are present in measures 258 and 260.
